

TOGGLE

'The Oxford Group of GNU/Linux Enthusiasts' (TOGGLE) was formed in the academic year 2012 -2013 under the guidance of Dr. R J Anandhi (Prof. and HOD CSE) by an enthusiastic bunch of students from the Department of Computer Science and Engineering, who volunteer for the 'Free Software Movement of Karnataka' (FSM-K).

FSMK is a registered not-for-profit organization whose primary objective is to spread and create awareness about free software technologies amongst different sections of the society. FSMK is driven by volunteers from various backgrounds like software professionals, government officials, academicians and students.

TOGGLE, the Students Chapter of FSMK at the Department of CSE, works actively with students and encourages them not only to use free software but also contribute to the development of various free softwares. They have also facilitated the migration of all the systems from Windows/Proprietary software to free and open source software. Today the Dept. Computer Science and Engineering of Oxford College of Engineering is proud to say that none of their systems make use of **Windows/proprietary software** and they have all successfully and enthusiastically moved over to FOSS as the only operating system in use.
