PREAMBLE

The Department of Pharmacognosy conducted the seminar on "Introduction to IPR" for the students and teaching faculties. There were 23 participants. Ms. Hyma Sara Varghese, Assistant Professor, The Oxford College of Pharmacy, Bangalore delivered the lecture.

The content delivered in the seminar is as follows:

The speaker began the session addressing on the seminar topic- "**Protecting Your Ideas- IPR**". Intellectual Property Rights (IPR) includes inventions, literary and artistic works, designs, symbols, names, and images. These are basically legal rights. Protection of such ideas through IPR is very important to safeguard your intellectual assets and prevent others from using them without permission.

Some common forms of IPR includes patents, copyrights, trademarks, and trade secrets. One can go for registering the IPR, he or she can protect the ideas from infringement and ensure that you have the legal authority on your inventions. Additionally, IPR plays a vital role in nurturing innovation, creativity and economic development. IPR encourages inventors with incentive to invest time, effort and resources in developing new ideas and products so thereby which they can get the benefits of their inventions. It prevents unauthorised use, reproduction or distribution of the inventions by others. IPR promotes research and development by providing protection to new technologies, and advancements in research. Additionally, IPR enhances competitiveness of businesses by offering protection to brands, innovations, trade secrets thereby enabling differentiation between themselves in the market and maintaining competitive environment.

Through copyrights and IPR, cultural works, traditions etc., can be protected thereby which cultural heritage can be preserved and further ensures that inventors receive recognition for their contributions. Overall IPR are essential for promotion of creativity, protecting investments in innovation, innovations and thereby acts as a driving force for societal progress.

OUTCOME

There were 23 participants in the seminar. New ideas, inventions, creations, art work has to be protected and this is possible through IPR. IPR offers numerous benefits like it encourages innovation, provides protection of rights, fosters economic growth, preserves cultural heritage, enhances competitiveness and promotes research and development. After attending the seminar, the participants were able to understand about the protection of new ideas through IPR thereby offering a conducive environment for dissemination of the knowledge and ideas.
