The Department of Pharmaceutics conducted the seminar on "Methods and Techniques in Research Methodology" for the teaching faculties. There were 22 participants. Dr. Gururaj S Kulkarni, Professor and HOD, The Oxford College of Pharmacy, Bangalore delivered the lecture.

The content delivered in the seminar is as follows:

The speaker began the session addressing on the seminar topic- **Methods and Techniques in Research Methodology**. Research methods refers to the specific procedures used for collecting and analyzing data. Developing research method is a part of your research design. Two key decisions to be kept in mind while planning the research methods viz., how you will collect data and how you will analyze the data. Collecting the data could be quantitative or qualitative in the form of words or numbers, primary or secondary- where you will collect the data yourself or you will use data that has already been collected by others, and descriptive or experimental, where you will record the measurements as it is or you will carry out an experiment.

Later, the speaker addressed for analysing the quantitative data, where using statistical methods to identify relationship between variables and for analysing the qualitative data, thematic analysis is used. Research methods includes an experiment, or it could be survey, interview, observation, or a case study. Research methods serve many purposes like identifying research problems, developing hypotheses, collection and analysis of data, and arriving at conclusions with enhanced understanding.

Additionally, the speaker emphasised the following situations in which the research methods can be used like for investigation of a problem, collection of data on a particular subject, in evaluating effectiveness of a programme through which the whether the programme is able to meet its objectives, in exploring new area. Research methods are used in numerous fields to carry out investigation, its analysis and find solution to the research question. The speaker further added that usage of research methods offers benefits like objectivity, replicability, generalizability, precision, efficiency and innovation.

Dr. Gururaj S Kulkarni addressing Q&A with the participants

OUTCOME

There were 22 participants in the seminar. The speaker discussed about the types of research methods. Research methods are used in various fields to investigate, analyse and find solution to the research question. These are used in diverse fields like psychology, sociology, medicine, education, business etc., Further, usage of research methods possess merits like objectivity, replicability, generalizability, precision, efficiency and innovation. So after attending this seminar, the participants have understood about the basics of research methodology and the same could be implemented in their research work.
