PREAMBLE

The Department of Pharmaceutical chemistry conducted the webinar on “IPR PROTECTION AND AWARENESS IN INDIA” for the teaching faculties and students. The webinar was conducted on Google Meet platform.

The IPR protection and awareness in India webinar was conducted for teachers and students to understand the set of exclusive rights protected by law which are accorded to creators or persons over their creations for a certain time period. Sir has given clear cut information about an IP right holder can realize value from its intellectual assets through utilizing it internally for its own processes or share it externally through provision of goods and services to customers and latter how can be achieved through legal mechanisms such as licensing and assignment. There were totally 69 participants, whereas the students and faculty have assembled in seminar hall no. 507 and the resource person has joined through MS team's platform through online mode.

THE COURSE CONTENT DELIVERED IN THE WEBINAR AS FOLLOWS:

The speaker of the session Adv Dinesh Dharmasheelan Panicker presented the address on “IPR Protection and Awareness in India”. The webinar has mainly focused on patents, design patent copy right, trade secret, the commercialization of patents and IP laws applicable in India. The speaker shared his magnificent knowledge and experience in the patents and intellectual property rights where he guided students about drafting the patents and what actually can be patented. This vast information regarding the field is essential in today's world where innovation led start-up's count every second. It is essential for the participants engaged in developing new concepts and products who should protect their ideas by patenting them or choose suitable Intellectual property rights. The contents covered by him were the basics forms of IPR. He covered about trademarks, copyrights and patents by giving various real-life examples. He also talked about various brands and gave knowledge about the salient features of IPR. He explained what can be patented and what cannot be patented as per rules and also, he talked about various terminologies used in IPR.

The webinar was further enlightened by the interesting questions answer session in the last which gave true colors to the webinar and gave chance to young innovations to speak their doubts regarding innovation and its protection.

The main aim of this webinar is to provide an essential information to the faculties, students and research community and so that it can be applied in respective development practice.

OUTCOME

There were totally 69 participants in the webinar. The overall session discussion benefitted the faculties, students and research community and also it would help them to think what to patent in their research work. The session included description about patents, design patent, copy right, trade secret, the commercialization of patents and IP laws applicable in India. The speaker shared his magnificent knowledge and experience in the patents and intellectual property rights where he guided students about drafting the patents and what actually can be patented. Overall, the session would help students to protect their ideas and business strategies.
