PREAMBLE

The Department of Pharmacy Practice hosted a seminar on "The Declaration of Helsinki: Ethical Principles for Medical Research involving human subjects" on 17th February 2023. The event was aimed at educate students, scholars, and teaching faculty and was attended by an impressive gathering of 20 individuals.

Dr Parthasarathy, Professor and HOD at The Oxford College of Pharmacy, Bangalore, delivered the lecture. His erudite and insightful presentation on the subject captivated the audience. He briefed to the participants about History of declaration of Helsinki, basic principles for all medical research, principle of medical research along with medical care.

The content delivered in the seminar is as follows:

The resource person interacted with the participants regarding a set of principles for the conduct of human experimentations for the medical professionals developed by the world medical association. The document consists of 12 segments, each describing specific principles. These segments are discussed below in detail along with the original statement. Also discussed regarding basic principles of medical research, which states medical research involving human subjects must conform to generally accepted scientific principles, be based on a thorough knowledge of the scientific literature, other relevant sources of information, and on adequate laboratory and where appropriate animal experimentation. Also about medical care, on which talked about equitable distribution, community distribution, intersectoral distribution, appropriate technology.

OUTCOME

There were 20 participants in the seminar. The seminar helped the participants understand the ethical principles outlined in the Declaration of Helsinki. They learned about the importance of obtaining informed consent from human subjects, ensuring their privacy and confidentiality, and the role of ethics committees in the ethical review process. The seminar also discussed the challenges and limitations of implementing ethical principles in medical research, particularly in resource-limited settings. It emphasized the need for ongoing education and training on ethical principles for all individuals involved in medical research. Overall, it helped to promote ethical conduct in medical research involving human subjects.
