PREAMBLE

The Oxford College of Pharmacy, Bengaluru, organised an online webinar on **Patenting & Types** program on 4th November 2023, for the pharmacy students. Patenting plays a crucial role in the pharmaceutical industry as they help in protecting the new innovations, such as new drugs, formulations, or drug delivery systems. It also focuses on patents, regulatory exclusivity, that allows pharmaceutical companies to secure their research and development.

The program was organised by Dr Jyoti Shrivastava, Head of the department, Pharmaceutical Chemistry. The webinar was carried out online through Microsoft teams. The program was started with the welcoming of Mrs Kanchan Singh. She is an Assistant Professor, Dept. of Pharmaceutics, PES College of Pharmacy, Bengaluru. She is having 7 plus years of teaching experience and 4 plus years of research experience. She is a life member of Association of Pharmaceutical Teachers of India (APTI) and Indian Pharmaceutical Association (IPA). And her extensive experience offered students to get a unique and valuable perspective on global career opportunities in the field of pharmacy.

She started the session welcoming all the students and thanked the management of The Oxford Group of Institution for inviting her to give the webinar. She was very enthusiastic throughout the session and explained all the concepts of patenting in detailed manner. The session helped the students in providing comprehensive insights into Intellectual Property Rights (IPR) that will be highly beneficial for pharmacy students, in providing them with knowledge and skills that are crucial in the pharmaceutical industry. The students learned the importance of IPR in pharmacy, about new innovations and research and development by providing legal protection for new drugs, formulations, and processes and how the commercialization of drugs takes place with the patents by the companies to bring any new medications to market. The session also benefitted the students to have the knowledge of patent laws and procedures that includes patent application process and global and local regulations. It also gave them an insight to the various career opportunities in patent law, regulatory affairs, and drug development. It gave the students some idea about how to conduct patent searches to ensure that new drug compounds or formulations do not infringe on existing patents and some understanding the structure and components of patents.

OUTCOME OF THE PROGRAM:

There were 51 participants in the webinar. The students gained the Knowledge of IPR that will makes students more attractive to employers in the pharmaceutical, biotech, and legal sectors. It helped the students in making informed decisions in their future roles, whether in research, product development, or regulatory affairs. It also gave the students a clear Understanding about the ethical and practical aspects of IPR can help students contribute to public health. An IPR webinar helped the students to gain a comprehensive understanding of the intellectual property landscape in the pharmaceutical industry, making them well-prepared for various professional roles and challenges in their careers.

OUTCOME OF THE PROGRAM

The outcome of today's seminar was resoundingly positive, with the active participation of **63** students which highlighted the critical importance of ideas to disrupt the current market with a new product or service. The students were benefitted with the ideology to start as a small business but the long-term vision is much greater to seek high profits and capture market share with an innovative new idea. Overall it was an interactive session where all the students actively participated in the session.

PREAMBLE

Herbal sciences research methodology entails methodical approaches to the investigation of medicinal plants and herbal products. Herbal research has become more important in the pharmaceutical and healthcare industries due to the increase in demand for natural and plant-based remedies worldwide. Herbal research has been transformed in recent years by new technologies like genomic analysis, sophisticated extraction methods, and nanotechnology, which allow scientists to study plant compounds more precisely and effectively. These developments have improved the safety, effectiveness, and marketability of herbal products by easing their development, standardisation, and authentication.

The program commenced with a warm welcome addressed from Ms. Chaithra. K, organising secretary, setting the stage for a productive and engaging event, Dr. Padmaa M Paarakh, Principal of The Oxford College of Pharmacy, delivered the inaugural address, articulated the program's significance and outlined its objectives. The seminar attracted diverse audiences, including 3 staff and 96 students. Who showed a keen interest and actively participated in through – provoking discussions with speaker, making their presence and contributions invaluable. Active participation and engagement are integral to the success of this seminar

Objectives of Seminar:

- Investigate and implement advanced techniques for the extraction, analysis, and standardization of herbal compounds.
- Utilize genomic, metabolomic, and bioinformatic tools to ensure the authenticity and quality of herbal materials.
- Develop universally accepted research frameworks to improve the reproducibility and comparability of herbal studies.

No. of participants: 99

Schedule:

Time Schedule	Programme
12:30 to 12:45 PM	Introduction about the Speaker (Dr. Ashok Kumar B S) and the topic.
12:45 to 1:30 PM	Presentation by Speaker on Research Methodology.
1:30 to 1.45 PM	Interactive session with the participants
1:45 to 2:00 PM	Conclusion, feedback and vote of thanks

Conclusion, feedback and vote of thanks:

At the end of presentation, the students were aware of investigation and how to implement advanced techniques for the extractions, analysis and standardization of herbal compounds, and gained the knowledge on Utilize genomic, metabolomic, and bioinformatic tools to ensure the authenticity and quality of herbal materials.

Students were motivated to attend future seminars, which helps to gain and apply their knowledge. Finally, Mrs. Chaithra Assistant Professor, Department of Pharmacognosy delivered the vote of thanks and she thanked Dr. Padmaa M. Paarakh, Principal, The Oxford College of Pharmacy, Bangalore for giving her an opportunity to organize this seminar.

OUTCOME OF THE PROGRAMME

Total 99 participants from under graduate had participated enthusiastically in the seminar. The students have developed and accurate comprehension of the way in which modern techniques are changing herbalism.

They understood the contribution of systematic approaches and modern techniques such as genomics, and nanotechnology in improving the standardization, safety, and effectiveness of herbal formulations. They understood the benefits of new technologies in the identification of bioactive substances and in the marketing of herbal preparations. In summary, the students have now grasped the consultative approach to the fusion of traditional knowledge and modern-day science.

PREAMBLE

In today's interconnected global environment, interdisciplinary studies have become essential to addressing complex issues and advancing knowledge in various fields. We can foster creativity and generate meaningful solutions by incorporating diverse perspectives, systematic approaches, and specialized expertise.

As we explore the most influential research methods for multidisciplinary studies, upholding high standards of rigour, transparency, and ethical conduct is crucial. The role of open dialogue in our research was equally important. We can embrace diversity and promote collaboration through open and respectful discussion. We aim to cultivate a culture of excellence that transcends academic boundaries and propels multidisciplinary research toward new frontiers. This introduction reflects our commitment to pushing knowledge boundaries through rigorous and innovative research methodology.

The program commenced with a warm welcome note by Dr. Noopur Srivastava, Organizing the Secretary. Dr. Padmaa M Paarakh, Principal of The Oxford College of Pharmacy, delivered the inaugural address and set the tone for the event.

Dr. A Muthukumar, Dean of Research, extended a formal welcome to esteemed guest speakers: Dr. Arunkumar S, Managing Partner of Poornayu Research Labs, Bangalore, and Dr. A. Ramu Mahesh, Assistant Professor of Pharmaceutical Chemistry at M.S. Ramaiah College of Pharmacy, Bangalore. Their expertise and insights were invaluable to our seminars.

A "Best Practices in Research Methodology for Pharmaceutical Sciences" seminar organized by the Department of Pharmacology at the Oxford College of Pharmacy attracted diverse students. The attendees included 47 students and 04 staff who actively engaged with esteemed speakers Dr. Arunkumar S and Dr. A. Ramu Mahesh and gained valuable insights into best practices in research methodology and pharmaceutical sciences.

11:30- 12.40	Session II:
12:40 – 12:55	Interactive session
12:55 – 1:00	Vote of thanks

SESSION I

Speaker details: Dr. Arunkumar S, Managing Partner of Poornayu Research Labs, Bangalore

Dr. Arunkumar S covers critical research design, study protocol development, data collection and analysis, statistical tools, ethical considerations, and research publication. The presentation incorporated real-world examples and case studies, promoting active participation and clarifying doubts. The practical application of these concepts will prepare you for future research endeavours, instilling confidence and readiness.

The seminar aimed to cultivate a research-oriented mindset, develop research skills, encourage innovative thinking, and prepare students for pharmaceutical research. By achieving these objectives, Dr. Arunkumar significantly contributed to students' academic and professional growth, empowering them to excel in pharmaceutical research and contribute meaningfully. His expert guidance has had a lasting impact on future endeavours.

The Speaker highlights the research gap and innovation.

SESSION II

Speaker details: Dr. A. Ramu Mahesh, Assistant Professor of Pharmaceutical Chemistry at M.S. Ramaiah College of Pharmacy, Bangalore.

Dr. A. Ramu Mahesh delivered an insightful presentation, articulating the objectives, highlights, and benefits of adopting rigorous research methods in pharmaceutical sciences. He emphasized the importance of a well-structured research design, robust data analysis, and ethical compliance to ensure high-quality research outcomes. Key highlights include enhancing research credibility, minimizing bias, and promoting reproducibility.

The Speaker interacts with students and describes the research methodology.

The Speaker also underscored the benefits of best practices, which include improved research quality, enhanced collaboration, and increased publication success. By providing a comprehensive overview, Dr Mahesh equipped 47 students and faculty with essential knowledge and skills to excel in pharmaceutical research, fostering a solid foundation for their future endeavours.

Mrs. Bhavani, Assistant Professor, delivered the heartfelt vote of thanks, expressing gratitude to the esteemed chief patron Dr. S.N.V.L. Narasimha Raju, Chairman of The Oxford Educational Institutions, and Dr Padmaa M Paarakh, Principal of The Oxford College of Pharmacy. She also acknowledged the tireless efforts of the organizing team and the enthusiastic participation of the faculty and students, whose presence had made the event a resounding success.

OUTCOME OF THE SEMINAR

The seminar provided impactful outcomes, including enhanced knowledge of research design, statistical tools, ethical considerations, and publication strategies. The participants developed critical thinking, problem-solving, and data analysis skills, fostering a research-oriented mindset and collaborative spirit. The seminar also prepared students for research careers, advanced degrees, and leadership roles, empowering them to contribute meaningfully to pharmaceutical research and address healthcare challenges.

This seminar prepared 47 students for research careers, advanced degrees, and leadership roles, empowering them to contribute meaningfully to pharmaceutical research and address healthcare challenges. The immediate benefits included increased confidence, improved research proposal writing, and enhanced presentation skills. At the same time, long-term outcomes promise innovative solutions, research leadership, and mentorship, ultimately advancing the pharmaceutical sciences and improving healthcare outcomes.

PREAMBLE

The Department of Pharmaceutics organized a seminar on "Research designs and research methodologies in pharmacy". The seminar was aimed to educate post-graduate students about the various research designs and methods followed in experiments and it was attended by an impressive gathering of 26 individuals of M.Pharm Pharmaceutics- 2nd sem and 4th Sem. Mrs. Dhanalakshmi. C, Assistant Professor at The Oxford College of Nursing Sciences, Bangalore, delivered the lecture at Room. No 101, 1st Floor.

No. of participants: 26

Schedule

Time schedule	Programme
11.00-11.10	Welcome address
11.10-11.40	Seminar talk
11.40-11.50	Interactive session
11.50-12.00	Vote of thanks

THE CONTENT DELIVERED IN THE SEMINAR IS AS FOLLOWS:

The seminar was commenced with a brief welcome note of the speaker by Dr. Vikram.T. The speaker explained to the participants on process of designing and conducting research, purpose of research design, components, different research designs used in experiments. Additionally, she explained about exploratory type research design, descriptive type research design, and experimental type research design and the research scenarios under which these can be implemented. Further, the resource person added about the basic principles to be followed in an experimental design viz., the principle of replication, the principle of randomization, and the principle of local control and the situations under which these has to be followed.

Finally, Mrs. Umprabha delivered the vote of thanks, expressing gratitude to our patron Dr. S.N.V.L Narasimha Raju, Chairman, The Oxford Educational Institutions and Dr.Padmaa M Paarakh, Principal, The Oxford College of Pharmacy. She also thanked the participants for their active involvement in organizing and participation in the seminar.

OUTCOME

There were 26 participants in the seminar. Research designs and research methodologies in seminar would help the participants to utilize both research designs and research methodologies in pharmacy studies, thereby researchers can improve patient care outcomes, advance pharmaceutical knowledge and enhance pharmacy practice in healthcare settings.

PREAMBLE

Intellectual property (IP) rights play a pivotal role in innovation, balancing the protection of life-saving discoveries with ensuring accessibility to humanity. As the pharmaceutical landscape evolves, complex challenges emerge at the intersection of patent law, regulatory frameworks, and global health imperatives.

The primary objective of intellectual property protection in pharmaceutical sciences is to drive innovation, ensure patient safety, and regulate quality standards by granting exclusive rights for novel therapeutics, formulations, and manufacturing processes through patents, trademarks, copyrights, and trade secrets, despite challenges from complex regulatory frameworks and potential infringement."

The program commenced with a warm welcome address from Dr Noopur Srivastava, organizing secretary, who set the stage for a productive and engaging event. Dr. Padmaa M Paarakh, Principal of The Oxford College of Pharmacy, delivered the inaugural address, articulated the program's significance, and outlined its objectives, showcasing our speakers' expertise in this seminar.

After that, Dr. A Muthukumar, Dean of R&D, formally welcomed the distinguished guest speaker, Mrs. Pooja Kumar, a Registered Patent Agent and Founder & Director of Innove Intellects LLP New Delhi. Her expertise in intellectual property is unparalleled, and her presence added immense value to the seminar. The seminar attracted diverse audiences, including 04 faculty, 88 students, who actively participated in thought-provoking discussions.

Number of participants – 92

THE CONTENT DELIVERED IN THE SEMINAR IS AS FOLLOWS.

Mrs. Pooja Kumar, a distinguished intellectual property expert, presented an enlightening lecture on "Intellectual Property in Pharmaceutical Sciences: Challenges and Opportunities." Leveraging her vast expertise in IP law and pharmaceutical innovation, she analyzed the complex interplay between patent protection, regulatory frameworks, and global health imperatives. The key highlights included:

1. Navigating complex patent landscapes and evergreening strategies
2. Leveraging regulatory frameworks for innovative drug development
3. Collaborative innovation and strategic partnerships
4. Effective IP management for improved health outcomes

The Speaker explained about IPR

Children's Education Society (Regd.)

The Oxford College of Pharmacy

(Recognised by the Govt. of Karnataka, Affiliated to Rajiv Gandhi University of Health Sciences, Karnataka;
Approved by Pharmacy Council of India, New Delhi)

The Speaker delivered a brief on IPR.

The Speaker's authoritative insights sparked engaging discussions among attendees, comprising industry professionals, researchers, and scholars. Her presentation underscored the pivotal role of IP in pharmaceutical innovation, emphasizing:

1. The balance between protection and accessibility
2. Strategic IP management for competitive advantage
3. Collaborative approaches for accelerated innovation

The Speaker interacted with students regarding the process and importance of IPR.

Children's Education Society (Regd.)

The Oxford College of Pharmacy

(Recognised by the Govt. of Karnataka, Affiliated to Rajiv Gandhi University of Health Sciences, Karnataka;
Approved by Pharmacy Council of India, New Delhi)

She explained in deeper understanding of the industry's challenges and opportunities. Her expert perspectives have facilitated to audience to understand and to navigate the complex IP landscape, driving innovation.

Dr. Pooja Kumar delineated the paradigmatic objectives of Intellectual Property Protection in Pharmaceutical Sciences, emphasizing its pivotal role in catalyzing innovation, ensuring patient safety, and upholding rigorous quality benchmarks through proprietary rights for novel biotherapeutics, formulations, and manufacturing processes, facilitated by patents, trademarks, copyrights, and trade secrets, amidst navigating intricate regulatory frameworks and potential infringement challenges.

Ms Bhavani, Assistant Professor, delivered the heartfelt vote of thanks to distinguished guest speaker, Mrs. Pooja Kumar, expressing gratitude to the esteemed chief patron, Dr S.N.V.L.Narasimha Raju, Chairman of The Oxford Educational Institutions, and Dr Padmaa M Paarakh, Principal of The Oxford College of Pharmacy. She also acknowledged the tireless efforts of the organizing team and enthusiastic participation of the students, whose presence had made the event a resounding success.

OUTCOME OF THE SEMINAR

The seminar provided significant educational outcomes for 88 participating students and faculty. The key takeaways encompassed a comprehensive understanding of intellectual property strategies, patent lifecycle management, regulatory frameworks, and collaborative innovation paradigms. This program facilitated enhanced critical thinking skills, recognizing the intricate balance between intellectual property protection and accessibility to the audience.

Furthermore, the seminar facilitated awareness of pharmaceutical intellectual property and regulatory affairs, inspiring students to explore research projects, internships, and industry collaborations. Ultimately, this enriching experience equipped the audience with expert knowledge, networking opportunities, and a heightened capacity to contribute meaningfully to the rapidly growing industrial advancements.

PREAMBLE

Intellectual Property rights mean providing property rights through patents, copyrights, plagiarism in research and trademarks. Holders of intellectual property rights have a monopoly on the usage of property or items for a specified time period.

Intellectual property refers to any intellectual creation, such as literary works, artistic works, inventions, designs, symbols, names, images, computer codes, etc. Intellectual property law exists in order to protect the creators and covers areas of copyright, trademark law, and patents.

In India, there are 7 types of intellectual property rights, namely copyright, trademarks, patents, geographical indications, plant varieties, industrial designs and semiconductor integrated circuit layout designs.

The program commenced with a warm welcome addressed from Ms. Chaithra. K, organising secretary, setting the stage for a productive and engaging event, Dr. Padmaa M Paarakh, Principal of The Oxford College of Pharmacy, delivered the inaugural address, articulated the program's significance and outlined its objectives. The seminar attracted diverse audiences, including 3 staff and 97 students. Who showed a keen interest and actively participated in through – provoking discussions with speaker, making their presence and contributions invaluable. Active participation and engagement are integral to the success of this seminar

Objectives of Seminar:

- To create awareness about IPRs, especially Patents/ Copyright.
- To enable Patents / Copyright searches.
- To guide inventors in respect of patenting their inventions.
- Plagiarism in research
- To encourage the creativity of the human mind for the benefit of all and to ensure that the benefits arising from exploiting a creation benefit the creator.

Schedule:

Time Schedule	Programme
1:30 to 1:45 PM	Introduction about the Speaker (Dr. Preeta Sharan) and the topic.
1:45 to 2:40 PM	Presentation by Speaker on IPR, Patent rights, Copy Rights
2:40 to 2.50 PM	Interactive session with the participants
2:50 to 3:00 PM	Conclusion, feedback and vote of thanks

Conclusion, feedback and vote of thanks:

At the end of presentation, the students were aware of Patent rights, monopoly on the usage of property or items for a specified time period, copyright, plagiarism in research & trademarks, industrial designs and semiconductor integrated circuit layout designs and how to apply for the patent.

Students were motivated to attend future seminars, which helps to gain and apply their knowledge. Finally, Mrs.Pavithra Devi Assistant Professor, Department of Pharmacognosy delivered the vote of thanks and she thanked Dr. Padmaa M. Paarakh, Principal, The Oxford College of Pharmacy, Bangalore for giving her an opportunity to organize this seminar.

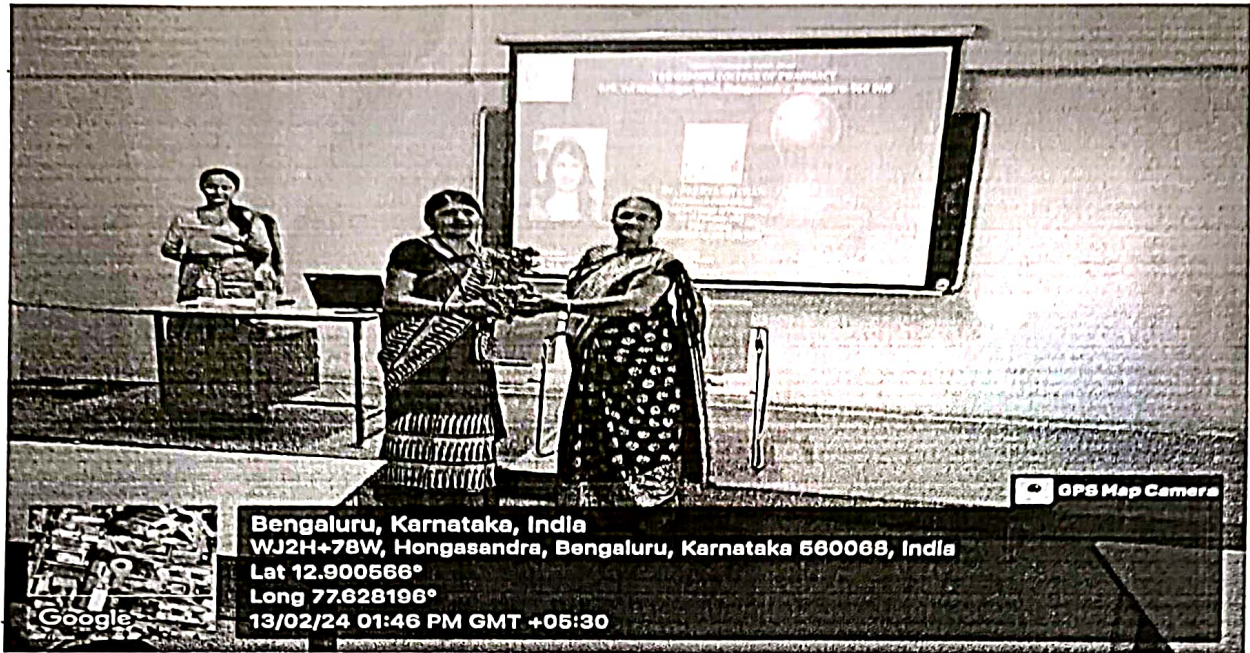

Dr. Padmaa M Paarakh Principal, HOD & Department of Pharmacognosy. The Oxford College of Pharmacy emphasized the need to go beyond textbooks and imbibe the knowledge from all the spheres for the overall development of any pharmacist. She encouraged and motivated students to take up challenges and put efforts to achieve excellence in their life.

OUTCOME OF THE PROGRAMME

There was enthusiastic participation of around 100 participants. Students from under graduate and post-graduate courses had participated enthusiastically in the seminar. Seminar helped the students by deepening their understanding of the importance of these IPR, how to protect their ideas which can be applied for patent and plagiarism in research. It also provides networking opportunities and potential job prospects. For society, it can promote innovation and creativity, protect intellectual property rights, prevent theft and infringement.

PREAMBLE

Community pharmacy refers to pharmacy that operates in the local community, providing a range of pharmaceutical services directly to the public. It typically involves the dispensing of prescription medications, over-the-counter drugs, health consultations, and advice on the proper use of medications. In addition to these, community pharmacies often offer services like health screenings, vaccinations, and chronic disease management support. Pharmacists in community pharmacies play a key role in patient education, helping individuals manage their health, and ensuring safe and effective use of medications. Community pharmacy outlets play a vital role in providing accessible healthcare services to rural populations. With India's vast rural landscape, there exists a significant opportunity for entrepreneurs to establish community pharmacy outlets, improving healthcare accessibility and quality.

communities and larger healthcare systems. The scope of community pharmacy outlets in rural India, highlighting their significance in promoting accessible and affordable healthcare.

Community pharmacy outlets stock a diverse range of essential medicines, ensuring that rural residents have access to necessary medications for common ailments. These outlets often promote generic alternatives, offering affordable options for patients, especially those with limited financial resources.

In rural areas with limited access to emergency healthcare, community pharmacies can provide essential supplies during emergencies, such as first aid kits and basic medical equipments. Pharmacists in rural areas can play a crucial role in promoting health awareness among the local population. They can provide information on disease prevention, healthy lifestyle practices, and proper medication usage. Pharmacists can offer personalized counseling to patients, ensuring that they understand their prescriptions, potential side effects, and proper administration. Community pharmacies can conduct basic health screenings, such as blood pressure and blood sugar checks, identifying potential health issues early.

He discussed regarding the Entrepreneurial Opportunities including establishing independent community pharmacies, Partnering with existing healthcare providers, Franchising models with pharmaceutical companies, E-pharmacies with rural outreach, Healthcare services outsourcing.

Rural areas often face challenges in terms of infrastructure, financial sustainability, and limited access to healthcare facilities. There may be a shortage of qualified pharmacists and healthcare professionals in rural areas. Strengthening the regulatory framework for community pharmacy outlets can ensure consistent standards of practice and patient safety. Government initiatives can provide incentives and support to community pharmacy outlets, encouraging them to expand their services and reach underserved populations.

Finally Dr Jeena susan saji delivered the vote of thanks and she thanked Dr. Padmaa M. Paarakh, Principal, The Oxford College of Pharmacy, Bangalore for giving an opportunity to organize this seminar.

PREAMBLE

Entrepreneurship is the process of identifying and exploiting opportunities to create value, which can be commercial, social, cultural, or institutional. It can involve creating new products or services, or improving existing ones. Entrepreneurship can be done by individuals or groups, and can take place in new or existing businesses.

CONTENT OF THE SEMINAR

Entrepreneurship is when an individual who has an idea act on that idea, usually to disrupt the current market with a new product or service. Entrepreneurship usually starts as a small business but the long-term vision is much greater, to seek high profits and capture market share with an innovative new idea. The program commenced with a warm welcome addressed from Ms. Chaithra. K, organising secretary, setting the stage for a productive and engaging event, Dr. Padmaa M Paarakh, Principal of The Oxford College of Pharmacy, delivered the inaugural address, articulated the program's significance and outlined its objectives. The seminar attracted diverse audiences, including 3 staff and 50 students. Who showed a keen interest and actively participated in through – provoking discussions with speaker, making their presence and contributions invaluable? Active participation and engagement are integral to the success of this seminar

Objectives of Seminar was to create awareness about Entrepreneurship & Entrepreneur, to guide students in respect of functions characters and Opportunities as Entrepreneur. Navigating the start-up journey, Strategies for success, to encourage the creativity of the new ideas for new startups.

PREAMBLE

The Department of Pharmacy practice conducted the seminar on 'intellectual property and rights to health' for the teaching faculties and students. There were totally 44 participants and was conducted in room no.501, The Oxford College of Pharmacy. Dr Kalyani B Biradar, professor, HKES college of pharmacy, delivered the lecture.

Dr Parthasarathy, organizing Secretary welcomed guests and participants to the seminar. The students and faculty members took part. The seminar was initiated with introduction intellectual property (IP) and rights to health are interconnected concepts that have significant implications for access to healthcare, medical innovation, and human well-being. the subject of the various relations existing between intellectual property and the right to health.

Time schedule	program
12:00-12:10	Introduction/ welcome address
12:10- 12:45	Benefits of intellectual property in Health
12:45- 1:00	Group discussion and vote of thanks.

The content delivered in the seminar is as follows:

The right to health is provided for in Article 25 of the Universal Declaration of Human Rights of December 10, 1948 (the UDHR). That Article provides that "Everyone has the right to a standard of living adequate for the health and well-being of himself and of his family, including food, clothing, housing and medical care and necessary social services, and the right to security in the event of unemployment, sickness, disability, widowhood, old age or other lack of livelihood in circumstances beyond his control." As we see, the State cannot guarantee an individual's right to health in the same way as the other rights could be implemented, such as the right to freedom for instance; health is therefore a product of the combined action of a series of variables, some of which are beyond human control.

The Patent System, before dealing with the patent system, it seems appropriate to speak briefly of intellectual property in general. Intellectual property is the generic term used to designate the subjective

rights that the various legal orders grant to the creators of immaterial assets of intellectual origin. Those immaterial assets may be of two kinds, namely either literary and artistic creations or distinctive signs and inventions. Intellectual property therefore establishes the protection of ideas and designs in art and technology, in industry and in trade.

Patents for Pharmaceutical Products Obviously, as technical and industrial needs and economic organization have evolved, patent law has itself evolved in recent years. In Europe above all, where it originated, the relevant provisions went on from being a vehicle for promoting the development of local industry and became a factor of the internationalizing.

phenomenon that has made it possible for the owners of patents to work them at the international level. It is thus worth noting that patent law has evolved and continues to evolve in line with the economic and technical-industrial necessities of the country in which it operates. This moreover explains the concept of industrial property in general being an instrument of development, a tool which, depending on the shape given it, is capable of influencing the economic and ultimately the social development of the country in which it is applied.

Finally Dr Parthasarathy delivered the vote of thanks and he thanked Dr. Padmaa M.Paarakh, Principal, The Oxford College of Pharmacy, Bangalore for giving her an opportunity to organize this seminar.

PREAMBLE

Intellectual property laws and policies shape innovation, creativity, and progress. As technological advancements and global interconnectedness escalate, the balance between protecting proprietary rights and fostering collective advancement becomes increasingly complex. The primary objective of this seminar is that the critical analysis examines the intricate intersections of intellectual property law and policy, exploring the tensions between creative freedom, economic incentives, and social welfare. Through a rigorous review of doctrine, jurisprudence, and stakeholder perspectives, this study aims to optimize intellectual property frameworks for societal betterment, addressing pressing questions on patent reform, copyright limitations, trademark protection, and the impact of emerging technologies on IP landscapes.

Dr. Preetha Sharan, a renowned expert in the field, delivered a captivating keynote address on “Intellectual Property Law and Policy: A Critical Analysis” to discern students. Her expertise and experience in the field ensured that the seminar attracted diverse audiences, including faculty and 89 Students, who were able to confidently participate in thought-provoking discussions, knowing they were learning from the best.

The Speaker explained IPR law and policy.

With her vast expertise, she provides an insightful analysis of intellectual property law's pivotal role in safeguarding intellectual rights, promoting innovation, and fostering economic growth. She meticulously examines the complexities of policy frameworks and highlights their significance in striking a balance between creative freedom and proprietary protection.

This presentation underscored the benefits of effective intellectual property management for businesses, entrepreneurs, and society, including enhanced competitiveness, improved research and development, and increased economic opportunities. It has provided valuable takeaways for attendees, including researchers, scholars, and industry professionals seeking to navigate the intricate landscape of intellectual property law

OUTCOME OF THE SEMINAR

The IPR seminar has provided a profound outcome, with 89 enthusiastic students and 04 faculty eagerly learning about intellectual property rights, laws, and policies. Through interactive discussions and expert insights, they have gained a deeper understanding of IP protection strategies and developed the essential skills to safeguard their innovative ideas. This empowering experience has fostered critical thinking, innovation, and entrepreneurship and provided valuable networking opportunities with IP experts and access to industry resources, reaffirming the value of their attendance and the benefits they have reaped from this seminar.

This empowering experience fostered critical thinking, innovation, and entrepreneurship while providing valuable networking opportunities with IP experts and access to industry resources. Consequently, students enhanced their competitive edge in research, academia, and industry, leading them to leadership in IP policy development, expertise in IP management, and contributions to innovative ecosystems. By attending this seminar, the audiences are now equipped to protect and commercialize their ideas, drive progress, and succeed in IP-related careers.

PREAMBLE

The Department of Pharmaceutics organized a seminar on "Intellectual property rights and its types" to educate students about the intellectual property rights (IPR) and its types and prevent any unauthorized use of new idea or invention by others. There were 27 participants in the seminar of M.Pharm Pharmaceutics and Pharmacology- 1st sem and 3rd sem. Mr. Rishav Kumar Jain, Regulatory Affairs Executive, Micro Labs Limited, Bengaluru delivered the seminar talk at Room. No 101, 1st Floor, The Oxford College of Pharmacy.

No. of participants: 27

Schedule

Time schedule	Programe
11.30-11.40	Welcome note
11.40-12.10	Seminar talk
12.10-12.20	Interactive session
12.20-12.30	Vote of thanks

THE CONTENT DELIVERED IN THE SEMINAR IS AS FOLLOWS:

The seminar was commenced with a welcome note by Dr. Gururaj S Kulkarni. The resource person initiated the seminar talk by first explaining about IPR. These are rights through which creators or owners can protect their any new creations or innovations, thereby allowing to get benefit for their work and prevent any unauthorized use by others. Such kind of protection encourages creation of new ideas, products and services. Then, he mentioned the benefits of IPR- like creators or owners of innovations can commercialize and benefit from their work. Further, he added it will promote economic growth, investment in research and development activities and dissemination of knowledge.

Later, he mentioned about various kinds of IPR viz., patents, copyrights, trademarks, trade secrets, industrial design rights, geographical indications and plant variety rights. The guest speaker gave an in-depth explanation of the aforementioned each type of IPR, their definitions, types and examples.

Additionally, he gave information about the regulatory bodies and challenges involved in IPR. He added regulatory bodies like World Intellectual Property Organization (WIPO) and Agreement on Trade-Related aspects of Intellectual Property Rights (TRIPS) lay down guidelines and global standards for IPR protection as well as enforcement. In today's times, balancing the creator's rights with public interest and addressing issues like piracy, infringement and counterfeit remains the major challenges in IPR.

PREAMBLE

A workshop on usage of animals for research work was organized to emphasize on the use of animals in research as it plays a crucial role in advancing medical and scientific knowledge. It enables researchers to study complex biological processes, test new therapies, and ensure the safety of products for human use.

No. of participants: 33

THE CONTENT DELIVERED IN THE SEMINAR IS AS FOLLOWS:

On 01/06/2024, The Oxford College of Pharmacy organized a seminar on Usage of animals for research work at room number 101 which involved 33 participants from M. Pharm students along with staffs. The seminar was commenced with a brief welcome note by the organizing secretary Dr. Vikram.T. The speaker Mr. Saleem Ahmed, Farooqia college of Pharmacy, delivered the speak on Usage of animals for research work which included the comprehensive overview of best practices and ethical guidelines.

Emphasizing the importance of humane treatment, the speaker outlined proper techniques for handling various species, highlighting the need for minimizing stress and discomfort. Participants were shown how to create suitable environments for the animals, ensuring their well-being throughout the research process. Additionally, the speaker discussed the necessity of obtaining appropriate approvals and following regulations

governing animal research. The speaker demonstrated proper techniques for animal handling and the ethical use of animals for research purposes. By integrating humane practices into experimental design, researchers can enhance the validity of their results while upholding ethical standards, ultimately contributing to a more responsible approach to scientific discovery.

Dr. Vikram T, the organizer, concluded the event with a vote of thanks, expressing gratitude to Chairman Dr. S.N.V. L. Narasimha Raju, The Oxford Group of Institutions, and Dr. Padmaa M. Paarakh, Principal, for their encouragement and support.

OUTCOME OF THE PROGRAM

The workshop on the usage of animals for research at The Oxford College of Pharmacy successfully equipped 33 participants with essential knowledge on ethical guidelines and best practices in animal handling. Attendees gained insights into minimizing animal stress and creating optimal research environments, enhancing both animal welfare and research integrity. The interactive demonstration fostered a deeper understanding of humane treatment and regulatory compliance. Overall, the session reinforced the importance of responsible practices in advancing scientific research while prioritizing animal welfare

PREAMBLE

The Department of Pharmacy practice conducted the seminar on “Unbiased Insights: Sampling Techniques for Reliable Research” in Room number 501,5th floor at 11.00am for the teaching faculties and students. Sample design is a definite plan for obtaining a sample from the sampling frame. Effective sampling techniques becomes important for achieving successful research study with accurate results. There were totally 77 participants. Dr.G.Parthasarathy, Professor and HOD Department Of Pharmacy Practice, delivered the lecture.

11.00 am – 11.15 am	Welcome Speech
11.15 am -12 .30 pm	Speech On “Unbiased Insights In Clinical Research”
12.35pm	Vote of thanks

The content delivered in the seminar is as follows:

Dr Priyadharshini.M, organizing Secretary inaugurated guests and participants to the seminar. The seminar was commenced with emphasis on basic understanding about sampling design in research ,where sample design is a definite plan for obtaining a sample from the sampling frame. It refers to the technique or the procedure the researcher uses for a sample from the sampling units from which inferences about the population is drawn. Sampling design is determined before any data are collected.The speaker emphasized on different steps involved in developing sample design in a research study,characteristics of good sample design.The speaker addressed different types of sample design such as ,Random Sampling: It involves selecting individuals randomly from the population, using techniques such as lottery or random number generation. This method ensures that every individual has an equal chance of being selected. Stratified Sampling: This involves dividing the population into subgroups

No.6/9, 1st Cross, Begur Road, Hongasandra, Bengaluru 560068

Children's Education Society (Regd.)

The Oxford College of Pharmacy

(Recognised by the Govt. of Karnataka, Affiliated to Rajiv Gandhi University of Health Sciences, Karnataka;
Approved by Pharmacy Council of India, New Delhi)

(strata) based on relevant characteristics, such as age or gender. Then, a sample is selected from each subgroup using random sampling techniques. Cluster Sampling: This involves selecting a subset of groups or clusters from the population, then selecting individuals from those groups. Multi-Stage Sampling: This involves combining different sampling techniques to select the sample, such as using stratified sampling followed by random sampling. Probability Sampling: This involves using random selection methods to select the sample, ensuring that every individual has a known probability of being selected. Non-Probability Sampling: This involves using non-random methods to select the sample, such as convenience or purposive sampling.

The need for sampling is very important aspect of randomization in research study. 1. sampling can save time and money. A sample study is usually less expensive and produces results at a relatively faster speed,enable more accurate measurements for a sample study is generally conducted by trained and experienced investigators.Sampling remains the only way when population contains infinitely many members,remains the only choice when a test involves the destruction of the item under study.It enables to estimate the sampling errors and, thus, assists in obtaining information concerning some characteristic of the population.

The speaker further stated about sampling errors. Sample surveys do imply the study of a small portion of the population and as such there would naturally be a certain amount of inaccuracy in the information collected. This inaccuracy may be termed as sampling error or error variance..

Hence, finally speaker concluded that effective sampling techniques is important for achieving successful research study with accurate results. At times, several methods of sampling is used for same study for getting appropriate outcome in research.

Finally Dr Priyadharshini.M delivered the vote of thanks and she thanked Dr. Padmaa M.Paarakh, Principal, The Oxford College of Pharmacy, Bangalore for giving her an opportunity to organize this seminar.

OUTCOME

There were 77 participants in the seminar. In the current seminar, Unbiased Insights: Sampling Techniques for Reliable Research, the speaker highlighted about sampling techniques, different steps involved in developing sample design in a research study, characteristics of good sample design. The speaker addressed different types of sample design for research study. Sampling errors in a research study and its impact in study outcomes and validity of results were also been discussed. Students actively took part in the session and had interactive conversation about sampling methods for conducting a research study.

PREAMBLE

The literature survey and subsequent research paper writing plays a crucial role in the aspect of the research journey. A thorough literature survey serves as the foundation for any prior studies to be done by scholars & laying the groundwork for their research. By systematic study of existing research, we gain a comprehensive understanding of the field, identify relevant contributions, and establish a platform for our own unique research question. Following this, we'll investigate into the art of drafting and compelling research paper, equipping the students with the skills to effectively organize and present your findings in a clear, concise, and impactful manner.

THE CONTENT DELIVERED IN THE SEMINAR IS AS FOLLOWS:

The Department of Pharmaceutical Chemistry at The Oxford College of Pharmacy organized a seminar titled "Overview of Literature Survey and Writing a Research Paper" for its PG students on June 18th, 2024. Dr. N. Raghavendra Babu, Associate Professor from G Pullareddy College of Pharmacy, Hyderabad, delivered the informative session to an audience of 25 students and 3 staffs.

Dr. Babu stressed the importance of a thorough literature survey as the foundation of any successful research project. He explained that a comprehensive survey equips researchers with a deep understanding of their chosen field, allowing them to build upon existing knowledge and identify gaps that their research can address.

The lecture explored various aspects of conducting a literature survey, including the different sources of information available, from academic journals to online databases. Dr. Babu emphasized the importance

of being cautious and critical while evaluating existing research. He also introduced valuable search strategies for efficiently locating relevant information.

The session transitioned into the art of drafting and compelling research paper. Dr. Babu discussed the importance of proper citation management tools, such as reference managers, to ensure accurate and organized referencing while writing a thesis or research paper. This informative session provided PG students with valuable insights and practical tools for conducting effective literature surveys and crafting impactful research papers. The interactive lecture equipped them with the necessary skills to navigate the

world of academic research with greater confidence.

OUTCOME OF THE SEMINAR

The seminar on “*Overview of Literature Survey and Writing a Research Paper*” emphasized the importance of a thorough literature survey as the foundation for research. The lecture covered various information sources, critical evaluation techniques, and search strategies. It then transitioned to crafting research papers, highlighting the use of reference management tools. This session equipped students with valuable skills for conducting effective literature surveys and writing impactful research papers, boosting their confidence in navigating academic research. All the 25 PG students and 3 faculty who attended were session were enlightened with the research process and were overwhelmed to use the knowledge gained in their respective research works.

PREAMBLE

On 5th July 2024, The Department of Pharmaceutical Chemistry at The Oxford College of Pharmacy held a career counselling seminar on "**Developing a Winning Business Idea**" Mrs. D Chitra delivered the lecture to 96 participants including final-year B. Pharm students and staff. The seminar was aimed at helping aspiring entrepreneurs create and refine their business ideas. The event featured an inspiring keynote address, interactive sessions on idea generation and market research, and a discussion on common entrepreneurial challenges. The lecture concluded at 1:00 PM, and the attending students found Mrs. D Chitra informative and engaging presentation to be valuable. The Department of Pharmaceutical Chemistry was pleased to have hosted such an insightful event, which undoubtedly provided students with a better understanding of the business career opportunities.

THE CONTENT DELIVERED IN THE SEMINAR IS AS FOLLOWS:

The seminar on "Developing a Winning Business Idea" was organized by the Department of Pharmaceutical Chemistry, The Oxford College of Pharmacy, Bengaluru. Dr. Nagalakshmi introduced the speaker for the day, D. Chitra. D. Chitra's session was informative, practical, and highly interactive, focusing on the key elements involved in developing a business idea that stands out in today's competitive market. D. Chitra stressed the importance of identifying a genuine market need or problem that your business idea could address. She explained that the most successful businesses often emerge from solving real problems faced by consumers.

She recommended conducting thorough market research, talking to potential customers, and observing market trends to identify pain points that can be addressed with innovative solutions. The session fostered the importance of creativity in business ideation. She encouraged participants to think beyond the obvious solutions and explore out-of-the-box ideas. Techniques such as brainstorming, mind mapping, and design thinking were discussed as effective ways to generate a wide array of ideas before narrowing down to the most feasible and impactful ones.

The seminar concluded with a summary of the key points discussed, along with practical advice on how to develop and implement a winning business idea. Dr. Nagalakshmi, the organizer, concluded the event with vote of thanks, expressing gratitude to Chairman Dr S.N.V.L Narasimha Raju, The Oxford Group of institutions, and Dr Padma M. Paarakh, Principal, for their encouragement and support.

PREAMBLE

The Department of Pharmaceutics organized a seminar on "**Importance of Financial Management in Development of entrepreneurship**". Financial management plays a vital role in the growth of entrepreneurship by offering the necessary framework for organizing, planning, directing and controlling financial activities within a business. The current seminar was aimed to bring awareness about key aspects of financial management to our under-graduate and post-graduate students. The seminar was conducted at Room. No 507, 5th floor.

No. of participants: 55

Schedule

Time schedule	Programme
11.15-11.30	Welcome address and Introduction
11.30-12.30	Seminar talk
12.30-12.45	Interactive session
12.45-1.00	Vote of thanks

THE CONTENT DELIVERED IN THE SEMINAR IS AS FOLLOWS:

The seminar was initiated with a welcome note by Dr. Vikram. T, Assistant Professor. The resource person Mr. Manjunath. M.J, Portfolio Manager, Wealth Broking delivered the seminar talk. He stressed on following key points highlighting the importance of financial management in the development of entrepreneurship.

Children's Education Society (Regd.)

(Recognised by the Govt. of Karnataka, Affiliated to Rajiv Gandhi University of Health Sciences, Karnataka;
Approved by Pharmacy Council of India, New Delhi)

Capital allocation- Entrepreneurs can more efficiently allocate funds to various business activities. It helps to determine the best debt to equity ratio to finance various operations, expansions and innovations.

Risk management- Financial risks viz., market volatility, interest rate swings and credit risks etc., can be identified and managed with the aid of effective financial management. Thus, entrepreneurs are able to reduce these risks and ensure long-term run of businesses by making wise judgements.

Budgeting and planning: With the aid of effective financial management, the entrepreneurs can set financial goals, predict cash flows, and create realistic budgets. Planning is essential to monitor progress and identify variations to achieve business objectives.

Profitability and growth: By examining financial accounts and performance measures, entrepreneurs can assess the profitability of the business ventures and accordingly can take well-informed decisions to drive growth.

Investment decisions: Investments in technology, infrastructure or human resources all must be considered by entrepreneurs.

Management of cash flow: Maintaining adequate cash flow is vital for seamless running of a business. With the aid of financial management, entrepreneurs can monitor cash inflows and outflows, managing working capital and adequate liquidity to meet immediate demands.

Finally, Mrs. Divya S Kumar delivered the vote of thanks, expressing gratitude to our patron Dr. S.N.V.L Narasimha Raju, Chairman, The Oxford Educational Institutions and Dr.Padmaa M Paarakh, Principal, The Oxford College of Pharmacy. She also thanked the participants for their active involvement in organizing and participation in the seminar.

OUTCOME

There were 55 participants in the seminar. To sum up, sound financial management is a vital component of entrepreneurship with which entrepreneurs can make wise choices, efficiently allot resources, ensure long-term expansion and spur growth. By giving top priority to financial management methods, the entrepreneurs can overcome obstacles, capitalize on opportunities and create successful business ventures in today's competitive environment. This would definitely help the participants in their future job endeavours.

PREAMBLE

This interdisciplinary seminar on research methodologies is a significant event that brings experts from various fields together to transform research approaches and address complex global issues. The theme, 'Breaking Research Barriers: Interdisciplinary Approaches to Methodology,' is particularly relevant in today's research environment, marked by increasing intricacy, rapid technological progress, and growing pressure for practical applications and societal benefits. This seminar encourages innovative knowledge integration, clarifies intricate system interactions, and propels evidence-based discoveries through lively discussions and joint exploration. By merging state-of-the-art techniques and epistemological viewpoints, you, as attendees, will play a crucial role in developing groundbreaking solutions, questioning existing theories, and shaping new research directions to address urgent worldwide challenges. The program commenced with a warm welcome address from Dr. A Muthukumar, organizing secretary, setting the stage for a productive and engaging event. Dr. Padmaa M Paarakh, Principal of The Oxford College of Pharmacy, delivered the inaugural address, articulated the program's significance, and outlined its objectives.

After that, Dr Noopur Srivastava, Head of the Department of Pharmacology, formally welcomed the distinguished guest speakers: Dr Gayathri Rajaram, Professor at KMCH College of Pharmacy, Coimbatore, and Dr Susil Kumar Sahoo, Dean of Administration at the Oxford College of Science, Bengaluru. The seminar attracted diverse audiences, including staff and 87 students. Who showed a keen interest and actively participated in thought-provoking discussions with distinguished speakers, making their presence and contributions invaluable. Active participation and engagement are integral to the success of this seminar.

No of participants – 91

SESSION I

Speaker I:

**Dr Gayathri Rajaram,
Professor, KMCH College of Pharmacy, Coimbatore**

Dr. Gayathri Rajaram delivered a thought-provoking keynote address on "Breaking Research Barriers: Interdisciplinary Approaches to Methodology. She emphasized the significance of transcending disciplinary boundaries and highlighted the benefits of interdisciplinary research collaboration.

She underscored the importance of integrating diverse methodologies to tackle complex challenges, foster innovative solutions, and advance knowledge. Dr. Gayathri's presentation focused on the following:

1. The limitations of traditional disciplinary silos
2. The potential of interdisciplinary approaches in addressing real-world problems
3. Practical strategies for facilitating collaborative research
4. The role of multidisciplinary methodology in promoting knowledge translation and societal impact

Dr. Gayathri's address set the tone for the seminar, inspiring participants to rethink their research approaches and explore new possibilities for collaboration. Her expertise and insights provided a valuable foundation for subsequent discussions and presentations.

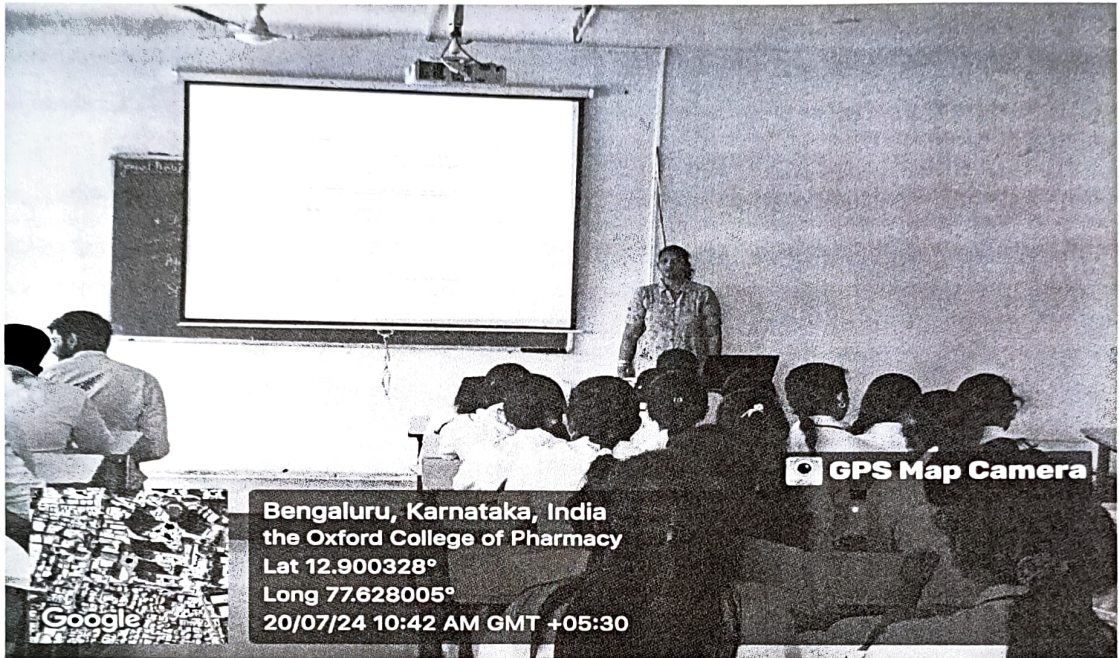

The keynote address audience comprised students, academics, researchers, and practitioners from different departments. Dr. Gayathri's contributions sparked lively debates and reflections on the transformative potential of interdisciplinary research, paving the way for meaningful exchanges and networking opportunities throughout the seminar.

SESSION II

Speaker II:

Dr Susil Kumar Sahoo,

Dean of Administration at the Oxford College of Science, Bengaluru.

Dr. Susil Kumar Sahoo's presentation provided invaluable insights for students, emphasizing the importance of preparation in interdisciplinary research. He highlights key aspects, including developing research questions and hypotheses, integrating diverse methodologies, cultivating critical thinking and problem-solving skills, and fostering effective collaboration and communication. Dr. Susil Kumar Sahoo stressed the need to transcend disciplinary boundaries, tackle complex challenges, and promote innovative solutions to real-world problems. His expertise guided students in navigating interdisciplinary research complexities, equipping them with essential skills to identify research gaps, design innovative methodologies, effectively collaborate, and communicate research findings.

The speaker delivers an innovative design methodology.

A resource person interacting with participants

This presentation sparked lively discussions among students, academics, and researchers, underscoring the significance of interdisciplinary research in addressing societal needs. Dr. Sahoo's address ultimately inspired students to become the next generation of multidisciplinary thinkers and problem-solvers, embracing a collaborative approach to drive positive change and advance knowledge in their respective fields.

Mrs. Bhavani, Assistant Professor, delivered the heartfelt vote of thanks, expressing gratitude to the esteemed chief patron Dr. S.N.V.L. Narasimha Raju, Chairman of The Oxford Educational Institutions, and Dr Padmaa M Paarakh, Principal of The Oxford College of Pharmacy. She also acknowledged the tireless efforts of the organizing team and enthusiastic participation of the students and staff, whose presence had made the event a resounding success.

OUTCOME OF THE SEMINAR

The recent academic seminar on "Breaking Research Barriers: Interdisciplinary Approaches to Methodology," effectively facilitated by esteemed expert members, resulted in substantial benefits for 87 students and including staff. Students gained valuable insights into the benefits of interdisciplinary research and how different methodologies can be integrated to address complex research challenges. The seminar facilitated productive discussions and networking opportunities, allowing participants to exchange ideas and establish potential collaboration across disciplines.

The event featured presentations by a diverse group of experts, each bringing their unique perspective and shedding light on the power of interdisciplinary approaches in driving impactful research outcomes.

Students left the seminar with a deeper appreciation for the value of integrating diverse methodologies and an enhanced understanding of how interdisciplinary collaboration can lead to innovative solutions. The event significantly contributed to their comprehensive knowledge of multidisciplinary research methodologies, fostering a collaborative and enriching learning environment. Notable outcomes include an enhanced grasp of advanced research methodologies and the establishment of valuable student connections. The seminar inspired and motivated these students to become the next generation of multidisciplinary thinkers and problem-solvers, embracing a collaborative approach to drive positive change and advance knowledge in their respective fields.

PREAMBLE

A seminar on Procedure to file a patent was organized to discuss a detailed description on how to file a patent, how to prepare a detailed application, including drawings and claims, that clearly describe the invention and how to file the application with the appropriate patent office and pay the required fees.

No. of participants: 19

Schedule

Time schedule	Programme
11.00-11.15	Welcome address
11.15-12.30	Seminar talk
12.30-12.45	Interactive session
12.45-1.00	Vote of thanks

THE CONTENT DELIVERED IN THE SEMINAR IS AS FOLLOWS:

On 10/8/2024, The Oxford College of Pharmacy organized a Seminar on Procedure to file a patent at room number 101, 1st floor from 11:00 AM-1:00 PM which highlighted the importance of essential steps to file a patent. The seminar was initiated with a welcome note by the organizing secretary Mrs. Divya S Kumar.

It began with conducting a comprehensive search to ensure the invention is unique, followed by the preparation of a detailed application, which includes descriptions, drawings, and claims that accurately describe the invention. After preparing the application, it must be filed with the appropriate patent office and the necessary fees must be paid. Once submitted, the patent office reviews the application thoroughly and may request amendments or additional information. If the application meets all requirements, the patent may ultimately be granted. The program was attended by 19 students from M. Pharm, along with staff. Our

Finally, Mrs. Adithi.P delivered the vote of thanks, expressing gratitude to our patron Dr. S.N.V.L Narasimha Raju, Chairman, The Oxford Educational Institutions and Dr.Padmaa M Paarakh, Principal, The Oxford College of Pharmacy. She also thanked the participants for their active involvement in organizing and participation in the seminar.

OUTCOME OF THE PROGRAM

The outcome of the seminar on procedure to file a patent was resoundingly positive, with the active participation of 19 participants which highlighted the comprehensive understanding of the patent filing process. Attendees learned the importance of conducting a novelty search and how to prepare a detailed application with accurate descriptions, drawings, and claims. The session emphasized the steps for filing with the appropriate patent office and the associated fees. Overall, participants left equipped with valuable knowledge to navigate the patent application process effectively.
